

THE STEAM QUEENS: WEEKLY VOCABULARY LIST

MONDAY

Word: Algorithm

Definition: A process or set of rules to be followed in calculations or other problem-solving operations, especially by a computer.

TUESDAY

Word: Byte

Definition: A unit of digital information that most commonly consists of eight bits.

WEDNESDAY

Word: Cache

Definition: A temporary storage space or memory that allows fast access to data.

THURSDAY

Word: Data

Definition: Facts and statistics collected together for reference or analysis.

FRIDAY

Word: Encrypt

Definition: To hide information using a code or mathematical algorithm so it's unreadable to readers without permission

TASK: Each week you will get new words from a different STEAM subject. Practice saying, writing, and using each word in a sentence. Also, tell us which subject you believe the words are from (sometimes words can fit in more than one). Share your sentences with us in the comment section!

TIP: Use [dictionary.com](https://www.dictionary.com) to help with pronunciation as needed.
